

Sales Success Aluminium PSG Mini 19 mm

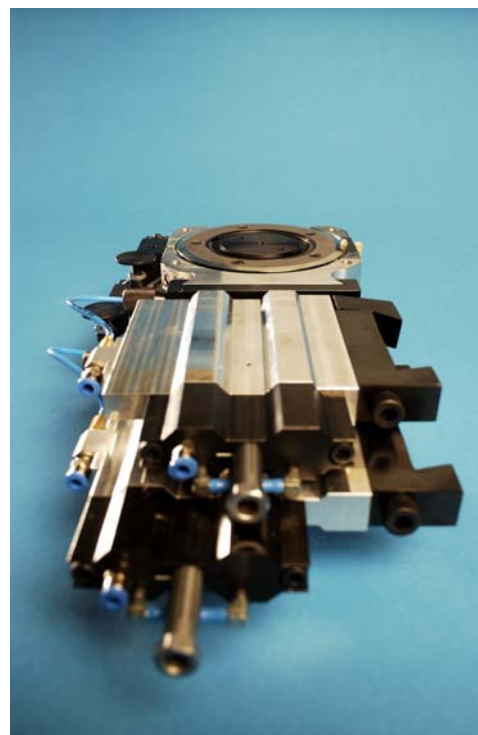

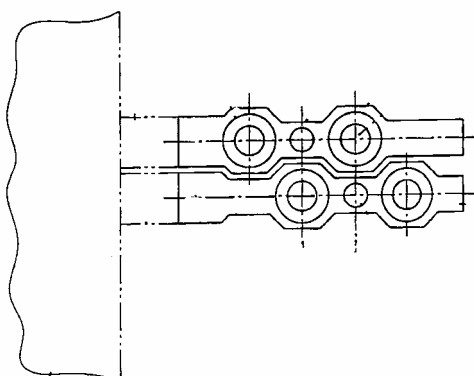

**DIENES fully automatic knife positioning system, type Modul IV
for an automatic slitting width adjustment of shear cut knife holders type PSGm19-Z3-30'**

technical details

working width	1300 mm
inside frame width	1900 mm
material to be cut	cablE strip, aluminium until max. 700µm, single layer
slitting speed	400 m/min
holder width	18,5 mm
for slitting widths	from 19 mm
shear cut knife holder PSG mini 19-Z3-30'	

Advantages

- narrow slit widths from 19mm (nesting concept)
- smooth running and high stability with double guidance
- zero clearance vertical and horizontal guidance
- high precision slitting edges

interlocked knife alignment - maximum stability - smallest slit widths
