

Modernization of Printing Machines

e.g. Cerutti, MAN-Roland, König & Bauer, Goebel, Heidelberger, Goss, Mitsubishi etc.

With its complete slitting systems and parts as transportation rings, tension rings, cutting rings, multiple knife blocks and knives, Dienes offers the perfect requisites that are required for the modernization of a printing machine.

Printing machines of the above mentioned producers have already been modernized successfully by Dienes. Thus, the service time was increased considerably, the generation of slitting dust was reduced and, in all cases, the slitting results were improved enormously.

Typical knife dimensions required for printing machines are:

| | | | |
|--------------|-----------------|------------------|------------------|
| top knife | 231 G 200269020 | DPM 23 | Ø 198 x 80 x 5 |
| top knife | 231 G 200269030 | Longlife 450° | Ø 198 x 80 x 5 |
| cup knife | 280 A 054001001 | tungsten carbide | Ø 200 x 160 x 8 |
| cup knife | 280 A 054002001 | tungsten carbide | Ø 200 x 160 x 8 |
| dished knife | 224 B 110395010 | 1.2067 | Ø 110 x 50 x 1,2 |
| top knife | 231 G 001288010 | 1.2201 | Ø 154 x 45 x 3 |
| top knife | 231 G 000188020 | 1.2201 | Ø 122 x 45 x 3 |
| top knife | 231 G 000188030 | 1.2201 | Ø 146 x 45 x 3 |
| top knife | 231 G 200269020 | DPM 23 | Ø 198 x 80 x 5 |
| top knife | 231 G 200269030 | DPM 23 | Ø 198 x 80 x 5 |
| dished knife | 224 C 130245010 | DPM 23 | Ø 130 x 80 x 1,5 |
