min. slit width: e. g. 4.5 mm, 5 mm, 6 mm, 8.5 mm  
knife: DIENES score cut knife D 76.96 mm

### Benefit from:

- 🌐 easy slit width change through effortless replacement of cassette
- 🌐 significant setup time savings compared to individual positioning
- 🌐 exclusion of positioning errors
- 🌐 blade change during running production
- 🌐 purchase of ready-for-use spare cassettes
- 🌐 cassette change to be carried out easily by operating personnel
- 🌐 optimum accuracy through exactly preadjusted slit widths
- 🌐 optimised synchronism and smooth knife running, i. e. even web tension and reduction or elimination of web tear
- 🌐 further application of formerly used bars
- 🌐 to be installed in all customary machines, also suitable for upgrading
- 🌐 high degree of user convenience and narrowest slit widths at the same time

Mini Cut for slit widths from 4 mm

slitting cassette for slit widths from 6 mm
